International application No. PCT/JP2005/006526

| _  | Dov. N   |  |  |  |  |
|----|--|--|--|--|--|
|    | Box 1  | No. I Basis of the opinion   |  |  |  |
| 1. | With r   | regard to the language, this opinion has been established on the basis of the international application in number in many second in the second |  |  |  |
| •  | . 19   | his opinion has been established on the basis of a translation from the original language into the following inguage , which is the language of a translation furnished for the purposes of international search under Rules 12.3 and 23.1(b)).  |  |  |  |
| 2. | With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of: |  |  |  |  |
|    | a. type of material:   |  |  |  |  |
|    |  | a sequence listing   |  |  |  |
|    | , 🗆  | table(s) related to the sequence listing   |  |  |  |
|    | b. format of material:   |  |  |  |  |
|    |  | in written format  |  |  |  |
|    |  | in computer readable form  |  |  |  |
|    | c. time  | of filing/furnishing:  |  |  |  |
|    |  | contained in the international application as filed.   |  |  |  |
|    |  | filed together with the international application in computer readable form.   |  |  |  |
|    |  | furnished subsequently to this Authority for the purposes of search.   |  |  |  |
| 3. | CO   | addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto is been filed or furnished, the required statements that the information in the subsequent or additional pies is identical to that in the application as filed or does not go beyond the application as filed, as propriate, were furnished.  |  |  |  |

### Box No. VI Certain documents cited

1. Certain published documents (Rules 43bis.1 and 70.10) and/or

2. Non-written disclosures (Rules 43bis.1 and 70.9)

see form 210

#### Re Item V.

- 1. Reference is made to the following documents:
  - D1 PATENT ABSTRACTS OF JAPAN vol. 1995, no. 04, 31 May 1995 (1995-05-31) -& JP 07 016956 A (OTSUKA PHARMACEUT FACTORY INC), 20 January 1995 (1995-01-20) cited in the application
  - D2: WO 2004/039562 A (SHOWA DENKO PLASTIC PRODUCTS CO., LTD; MIZUO, TAKAYUKI; NAKAGAWA, TERU) 13 May 2004 (2004-05-13)

## 2. PRODUCT CLAIM 5 - NOVELTY

The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claim 5 is not new in the sense of Article 33(2) PCT.

The product claimed in independent claim 5 is only characterised by the process by which it is obtained. The applicant's attention is drawn to the fact that a product can only be considered as new and inventive when it is characterised by new and inventive features. A product is not to be considered new and inventive only because it is obtained by a new and inventive process (see the Guidelines, PCT/GL/ISPE/1, A5.26[1]).

Independent claim 5 does not contain any feature allowing to distinguish this product from the product disclosed by document D1.

## 3. METHOD CLAIMS 1-4

3.1. Document D1, which is considered to represent the most relevant state of the art, discloses (the references in parentheses applying to this document):

a method for producing a bag with a mouth member (1) by melt-bonding a tubular mouth member (1) comprising a thermoplastic resin and a bag unit comprising a flexible film (2), said method comprising preheating (cf. figure 2), the tubular mouth member (1), inserting the heated mouth member (1) into an opening part of the bag unit and pressing and

Ġ

thereby melt-bonding the mouth member (1) to the opening part of the bag unit.

From this, the subject-matter of independent claim 1 differs in that:

the preheating of the tubular mouth member is performed while rotating it around the cylinder axis thereof (further referred to as special technical feature or STF).

The subject-matter of claim 1 is therefore novel (Article 33(2) PCT).

The problem to be solved by the present invention may be regarded as securing a uniform surface temperature of the mouth member in the preheating step.

The available prior art neither discloses nor render obvious a method including the above-mentioned STF.

Therefore, the solution to the above-mentioned problem proposed in claim 1 of the present application is considered as involving an inventive step (Article 33(3) PCT).

- 3.2. Claims 2-4 are dependent on claim 1 and as such also meet the requirements of the PCT with respect to novelty and inventive step.
- 4. APPARATUS CLAIMS 6-12
- 4.1. The same arguments specified with respect to independent method claim 1 also hold for independent apparatus claims 6 and 7.

The subject-matters of claims 6 and 7 are therefore novel (Article 33(2) PCT) and considered as involving an inventive step (Article 33(3) PCT).

4.2. Claims 8-12 are dependent on claim 7 and as such also meet the requirements of the PCT with respect to novelty and inventive step.

Re Item Vi.

# WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY (SEPARATE SHEET)

International application No.

PCT/JP2005/006526

1. The attention is drawn to document D2, published on 13 May 2004, claiming the priority dates of 29 October 2002 and 20 June 2003, which describes the subject-matter of claims 1,2,3,4,5,6,7,9 (cf. page 12, lines 18-21).

#### Re Item V.

- 1. Reference is made to the following documents:
  - D1 PATENT ABSTRACTS OF JAPAN vol. 1995, no. 04, 31 May 1995 (1995-05-31) -& JP 07 016956 A (OTSUKA PHARMACEUT FACTORY INC), 20 January 1995 (1995-01-20) cited in the application
  - D2: WO 2004/039562 A (SHOWA DENKO PLASTIC PRODUCTS CO., LTD; MIZUO, TAKAYUKI; NAKAGAWA, TERU) 13 May 2004 (2004-05-13)

## 2. PRODUCT CLAIM 5 - NOVELTY

The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claim 5 is not new in the sense of Article 33(2) PCT.

The product claimed in independent claim 5 is only characterised by the process by which it is obtained. The applicant's attention is drawn to the fact that a product can only be considered as new and inventive when it is characterised by new and inventive features. A product is not to be considered new and inventive only because it is obtained by a new and inventive process (see the Guidelines, PCT/GL/ISPE/1, A5.26[1]).

Independent claim 5 does not contain any feature allowing to distinguish this product from the product disclosed by document D1.

### 3. METHOD CLAIMS 1-4

3.1. Document D1, which is considered to represent the most relevant state of the art, discloses (the references in parentheses applying to this document):

a method for producing a bag with a mouth member (1) by melt-bonding a tubular mouth member (1) comprising a thermoplastic resin and a bag unit comprising a flexible film (2), said method comprising preheating (cf. figure 2), the tubular mouth member (1), inserting the heated mouth member (1) into an opening part of the bag unit and pressing and

thereby melt-bonding the mouth member (1) to the opening part of the bag unit.

From this, the subject-matter of independent claim 1 differs in that:

the preheating of the tubular mouth member is performed while rotating it around the cylinder axis thereof (further referred to as special technical feature or STF).

The subject-matter of claim 1 is therefore novel (Article 33(2) PCT).

The problem to be solved by the present invention may be regarded as securing a uniform surface temperature of the mouth member in the preheating step.

The available prior art neither discloses nor render obvious a method including the above-mentioned STF.

Therefore, the solution to the above-mentioned problem proposed in claim 1 of the present application is considered as involving an inventive step (Article 33(3) PCT).

- 3.2. Claims 2-4 are dependent on claim 1 and as such also meet the requirements of the PCT with respect to novelty and inventive step.
- 4. APPARATUS CLAIMS 6-12
- 4.1. The same arguments specified with respect to independent method claim 1 also hold for independent apparatus claims 6 and 7.

The subject-matters of claims 6 and 7 are therefore novel (Article 33(2) PCT) and considered as involving an inventive step (Article 33(3) PCT).

4.2. Claims 8-12 are dependent on claim 7 and as such also meet the requirements of the PCT with respect to novelty and inventive step.

Re Item VI.

# WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY (SEPARATE SHEET)

International application No.

PCT/JP2005/006526

1. The attention is drawn to document D2, published on 13 May 2004, claiming the priority dates of 29 October 2002 and 20 June 2003, which describes the subject-matter of claims 1,2,3,4,5,6,7,9 (cf. page 12, lines 18-21).
